## Education

### Software Engineering Immersive Course

Codeworks [🔗](#)

Jun 2020 – Sep 2020

### BSc Biochemistry with Honours

King's College London

Sep 2016 – May 2019

## Languages

Malay | English

## Skills

- ReactJs
- React Native
- Javascript
- Typescript
- MongoDB
- SQL
- GraphQL
- Agile
- Scrum
- Node JS
- TDD

## Profile

I am a biochemist turned software developer, with a passion for learning, problem solving and the occasional West End musical. I enjoy working on my own projects as well as with teams of others, and specialise in web application development. I am experienced with javascript and typescript primarily, but also write in python, java and sql. I rigorously employ TDD in my applications and have a passion for clean, stable and well designed programming. I am open to any feedback as I am always looking for new ways to improve.

## Projects

### Lukis-Lukis [🔗](#)

A real time drawing web application .

Build with Express, Socket.io, Node js, Reactjs, MongoDB, Mongoose

### AloeThere Legacy Project

A mobile application for plant comparison and care.

React Native, Expo, Cypress, Jest.

### Alien Invasion

A clone of the popular retro game Alien Invasion.

Python, Pygame

### Encrypto Pass

Desktop application that encrypts and stores accounts and passwords, allowing for easy access to passwords securely.

Java, JavaFx

## Professional Experience

### Software Developer

Furniss

"Furniss" is an open source web application for buying and selling re-purposed furniture.

My role on this project was database design and implementation, backend development and frontend development. I worked in a team of four, with two frontend developers and one full stack developer.

Technologies: React, Redux, Typescript, Node-js, Express, Postgresql, Jest.
